

New! DietGel® 76A

Clearly Better

DietGel® 76A is a purified soft maintenance diet for laboratory rodents; a superior alternative to traditional mash diets modeled on the 76A diet formulation.

Solutions

- Designed to retain moisture without skinning over
- Reduces time and labor
- Reduces potential for contamination

Quality

- Purified ingredients exclude phytoestrogens and nitrosamines
- Complies with quality standards, tested by an independent laboratory
- Individually coded with lot and date of expiration
